- Rhetorical questions

Down in the trenches: Observations and observational tests

- Sophisticated new models, not easy to fit to the data (computationally expensive algorithms).
- Mass outflow rates: how robust are the current estimates? Uncertainties include: ξ , f_V , C_f
- Need to know the FUV continuum. Do we?
- What is the fraction of BAL QSOs regardless of orientation?
- What about them UFOs? What is it that the government does not want us to know?

Models and modeling tools

- Can model explain the full phenomenology that we observe?
Do they allow us to understand variability and transitions between types?
- Can Fe K lines they be produced by scattering in the outflow? What about the classic lines of the BLR?
- What is the future of Monte-Carlo algorithms/codes?
What are the limiting assumptions?
- How do we check/compare ionization balance and momentum feedback in different codes.

Outflow physics

- What are the crucial parameters that determine the type of outflow? dM/dt , L/L_{Edd} , α_{ox} ?
- Absorbing filaments: models place them very close to the BH as well as very far away. However, whenever we can constrain the distance it turns out to be $\sim \text{kpc}$. (need refined models? is there a selection effect?)
- What is the connection between the absorbing media observed in different bands (X-ray vs UV absorbers)?
- Launching + Acceleration: do we have a progression of different mechanisms over different radii?

The big picture

- **Obscuring torus:** Is it a dusty outflowing wind or a static structure?
- **Inflows:** What do the models have to say? Can we observe them?
- **Seyferts:** Why do they not have BAL/very fast outflows? Should they?
- What is the connection between the inner outflow ($r \ll 0.1$ pc) and outer outflow ($r > 10-100$ pc)?

Existential and rhetorical questions

Existential and rhetorical questions

- What strange thing will Pat Hall talk about at the next meeting?

Existential and rhetorical questions

- What strange thing will Pat Hall talk about at the next meeting?
- Steve Kraemer's existential question

Existential and rhetorical questions

- What strange thing will Pat Hall talk about at the next meeting?
- Steve Kraemer's existential question
- How do we understand expressions of (hegemonic) masculinity in post-modern/post-colonial AGN outflows.

Applause for the awesome work by the Local Organizing Committee
